### RECOMMENDATIONS

#### MAJOR RECOMMENDATIONS

On the basis of the effectiveness of pediatric cancer centers in treating children and adolescents with cancer, the American Academy of Pediatrics recommends the following:

- Children and adolescents with newly suspected and/or recurrent malignancy should be referred to a pediatric cancer center for prompt and accurate diagnosis and management.
- Children and adolescents with newly diagnosed and/or recurrent malignancies should have their treatment coordinated by a board-certified pediatric hematologist/oncologist; treatment should be prescribed and initiated at a pediatric cancer center but may be continued at a center not specialized in the care of the pediatric oncology patient under the continuing oversight of the center's multidisciplinary team.
- Multidisciplinary team members should have pediatric expertise within their specialty area.

The original guideline document also details personnel, facilities, and capabilities that should be provided in a pediatric oncologic care center.

#### CLINICAL ALGORITHM(S)

None provided

### EVIDENCE SUPPORTING THE RECOMMENDATIONS

#### TYPE OF EVIDENCE SUPPORTING THE RECOMMENDATIONS

The type of supporting evidence is not specifically stated for each recommendation.

### BENEFITS/HARMS OF IMPLEMENTING THE GUIDELINE RECOMMENDATIONS

#### POTENTIAL BENEFITS

The clinical results in children with cancer have been shown to be superior when specialized diagnostic, supportive, and specific care is given at a pediatric cancer center.

#### POTENTIAL HARMS

Not stated

### IMPLEMENTATION OF THE GUIDELINE

#### DESCRIPTION OF IMPLEMENTATION STRATEGY

An implementation strategy was not provided.
